

§ 2903.2

use, or distribution and the ability to conduct educational and technical support programs. The Secretary delegated this authority to the Chief Economist, who in turn delegated this authority to the Director of OEPNU.

(b) The regulations of this part do not apply to grants awarded by the Department of Agriculture under any other authority.

§ 2903.2 Purpose of the program.

The Biodiesel Fuel Education Program seeks to familiarize public and private vehicle fleet operators, other interested entities, and the public, with the benefits of biodiesel, a relatively new fuel option in the United States. It will also address concerns previously identified by fleet operators and other potential users of this alternative fuel, including the need to balance the positive environmental, social and human health impacts of biodiesel utilization with the increased per gallon cost to the user. It is the Program's goal to stimulate biodiesel demand and encourage the further development of a biodiesel industry in the United States.

§ 2903.3 Eligibility.

(a) Eligibility is limited to nonprofit organizations and institutions of higher education that have demonstrated both knowledge of biodiesel fuel production, use, or distribution and the ability to conduct educational and technical support programs.

(b) Award recipients may subcontract to organizations not eligible to apply provided such organizations are necessary for the conduct of the project.

§ 2903.4 Indirect costs.

(a) For the Biodiesel Fuel Education Program, applicants should use the current indirect cost rate negotiated with the cognizant Federal negotiating agency. Indirect costs may not exceed the negotiated rate. If no indirect cost rate has been negotiated, a reasonable dollar amount for indirect costs may be requested, which will be subject to approval by USDA. In the latter case, if a proposal is recommended for funding, an indirect cost rate proposal must be submitted prior to award to support the amount of indirect costs requested.

7 CFR Ch. XXIX (1–1–06 Edition)

(b) A proposer may elect not to charge indirect costs and, instead, charge only direct costs to grant funds. Grantees electing this alternative will not be allowed to charge, as direct costs, indirect costs that otherwise would be in the grantee's indirect cost pool under the applicable Office of Management and Budget cost principles. Grantees who request no indirect costs will not be permitted to revise their budgets at a later date to charge indirect costs to grant funds.

§ 2903.5 Matching requirements.

There are no matching funds requirements for the Biodiesel Fuel Education Program and matching resources will not be factored into the review process as evaluation criteria.

Subpart B—Program Description

§ 2903.6 Project types.

OEPNU intends to award continuation grants to successful Biodiesel Fuel Education Program applicants. A continuation grant is a grant instrument by which the Department agrees to support a specified level of effort for a predetermined project period with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued government support would be in the best interest of the Federal government and the public. If these three elements are met, OEPNU plans to provide additional support to the funded project(s).

§ 2903.7 Project objectives.

(a) Successful projects will develop practical indicators or milestones to measure their progress towards achieving the following objectives:

- (1) Enhance current efforts to collect and disseminate biodiesel information;
- (2) Coordinate with other biodiesel educational or promotional programs, and with Federal, State and local programs aimed at encouraging biodiesel use, including the EPAct program;
- (3) Create a nationwide networking system that delivers biodiesel information to targeted audiences, including users, distributors and other infrastructure-related personnel;

(4) Identify and document the benefits of biodiesel (*e.g.*, lifecycle costing); and

(5) Gather data pertaining to information gaps and develop strategies to address the gaps.

(b) [Reserved]

Subpart C—Preparation of an Application

§ 2903.8 Program application materials.

OEPNU will publish periodic program announcements to notify potential applicants of the availability of funds for competitive continuation grants. The program announcement will provide information about obtaining program application materials.

§ 2903.9 Content of an application.

(a) Applications should be prepared following the guidelines and the instructions in the program announcement. At a minimum, applications shall include: a proposal cover page, project summary, project description, information about key personnel, documentation of collaborative arrangements, information about potential conflicts-of-interest, budget forms and a budget narrative, information about current and pending support, and assurance statements.

(b) Proper preparation of applications will assist reviewers in evaluating the merits of each application in a systematic, consistent fashion. Specific instructions regarding additional application content requirements and the ordering of application contents will be included in the program announcement. These will include instructions about paper size, margins, font type and size, line spacing, page numbering, the inclusion of illustrations, and electronic submission.

§ 2903.10 Submission of an application.

The program announcement will provide the deadline date for submitting an application, the number of copies of each application that must be submitted, and the address to which proposals must be submitted.

§ 2903.11 Acknowledgment of applications.

The receipt of all applications will be acknowledged. Applicants who do not receive an acknowledgment within 60 days of the submission deadline should contact the program contact indicated on the program announcement. Once the application has been assigned a proposal number, that number should be cited on all future correspondence.

Subpart D—Application Review and Evaluation

§ 2903.12 Application review.

(a) Reviewers will include government and non-government individuals. All reviewers will be selected based upon training and experience in relevant scientific, extension, or education fields, taking into account the following factors:

(1) The level of relevant formal scientific, technical education, or extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education, or extension activities; and

(2) The need to include as reviewers experts from various areas of specialization within relevant scientific, education, or extension fields.

(b) In addition, when selecting non-government reviewers, the following factors will be considered:

(1) The need to include as reviewers other experts (*e.g.*, producers, range or forest managers/operators, and consumers) who can assess relevance of the applications to targeted audiences and to program needs;

(2) The need to include as reviewers experts from a variety of organizational types (*e.g.*, colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations) and geographic locations;

(3) The need to maintain a balanced composition of reviewers with regard to minority and female representation and an equitable age distribution; and

(4) The need to include reviewers who can judge the effective usefulness to producers and the general public of each application.

(c) Authorized departmental officers will compile application reviews and
